DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 4-7, 13-17, 18-19, and 20-28 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 15-48 of copending Application No. 10/575,202. Although the conflicting claims are not identical, they are not patentably distinct from each other because both copending Application and instant application claim a light-emitting element including a first layer, a second layer, a third layer, and the fourth layer are sandwiched between an anode and a cathode. Moreover, independent claims 1, 20, 21, and 22 in the instant application are either broader version of independent claim 15 of the copending application or are

Art Unit: 2814

obvious variations thereof. For example, claim 15 in copending application claims "wherein the cathode has a layer containing reflective metal", whereas claims 1 and 20-22 in the instant application claims "the cathode containing a metal". The fact is that both copending application and the instant application are claiming common subject matter.

Dependent claims 4-7, 13-17, 18-19, and 23-28 of the instant application claim the same subject matters as the subject matters claimed in dependent claims 17- 48 of the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

3. Applicant argues that the applied prior art does not suggests all of the limitations of the base claims including the limitation of having "a second layer formed over and being in direct contact with the first layer and containing an organic compound and an electron-supplying material" as amended.

This argument is persuasive. Therefore, the ground of rejection(s) under the combination between Forrest et al and Liao et al is/are withdrawn. However, a provisional obviousness-type double patenting rejection as being unpatentable over the copending Application No. 10/575,202 is maintained because the Terminal Disclaimer has not been filed.

Conclusion

Art Unit: 2814

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
